

### KeyKeg Shipping Changes – February 2026

Please note that our hauliers have informed us they can no longer transport pallets of KeyKegs stacked higher than 3 rows of kegs due to height restrictions. This will have the following impact on KeyKeg shipments from this point onwards:

- **30L KeyKegs – Packed in rows of 12 kegs. Maximum of 36 30L KeyKegs (3 rows) per pallet.**
- **20L KeyKegs – Packed in in packed rows of 20 kegs. A maximum of 60 20L KeyKegs (3 rows) per pallet.**

**As before, we are unable to split KeyKegs from their pack sizes (12 for 30L, and 20 for 20L).**

We work closely with our local Dundalk-based hauliers to provide the best reliable delivery to breweries throughout Ireland and Northern Ireland. They are multi-award-winning, accredited ADR hauliers and members of the *Irish Exporters Association (IEA)* and *Irish Road Haulage Association (IRHA)*. As we bring our warehouse systems in line with these updated requirements, we will unfortunately be unable to load KeyKegs in alternative configurations in our warehouse for collection by different hauliers.

We appreciate this may impact delivery costs and appreciate your understanding as these changes are due to external restrictions beyond our control. We work closely with KeyKeg as a trusted distributor, and we remain committed to providing competitive pricing and exceptional service for your brewing ingredients and dispense solutions. KeyKegs are the industry gold standard for lightweight one-way circular kegs.

We want to offer you [the best possible pricing on all your brewing ingredients and KeyKegs](#). Get in touch with our brewery experience team today at [iesales@brewersselect.com](mailto:iesales@brewersselect.com) or call 042 93 22 041 to see what we can do for you.
